

IAN RENSHAW

Associate Professor

Ian Renshaw is an Associate Professor at Queensland University of Technology, Brisbane, Australia.

Previously, Ian has worked in Higher Education in the UK and New Zealand specializing in Skill Acquisition, Motor Control and Learning, Sports Coaching and Games Teaching. Ian's research focus is on applying ecological dynamics to sport and education settings. Ian has worked as a skill acquisition advisor to numerous elite sports teams and with state and national bodies across the world. He has also advised on programme design for junior sport as well as supporting coach education across a range of sports. Ian's work continues to influence practice in educational settings with ecological psychology, nonlinear pedagogy and a constraint-led approach continuing to grow in school programmes as well as in formal assessed curricula across assessment bodies.
