

ØYVIND BJERKE

Associate Professor

Øyvind Bjerke is an Associate professor in Physical Education and Sport at the Department of Teacher Education, NTNU, Trondheim. His research areas are mainly within physical education teacher education, pedagogy, motivation and motor learning from a dynamical systems approach.

Øyvind has been working with physical education teacher education in over 20 years and are interested in how students are learning in higher education. He aims to improve the student teachers learning in practical and theoretical situations using non-linear pedagogy. He has previous experience from teaching in school and as a trainer in soccer and alpine skiing.
